

Well-known

AdBlue®/AUS40

maker in

Asia Pacific

We offer a comprehensive solution portfolio to ensure a reliable supply of our

Bluetech AdBlue®

Bluetech AUS40

High Standard: ISO22241 and German VDA Approved

The VDA license represents the highest standard in the AdBlue® market, guaranteeing world-class quality.

Various Packaging Size: 10 Litres to 20,000 Litres

Whether you want to top up on the road or set up a refilling station, we can assist you!

High Production Capacity Volume

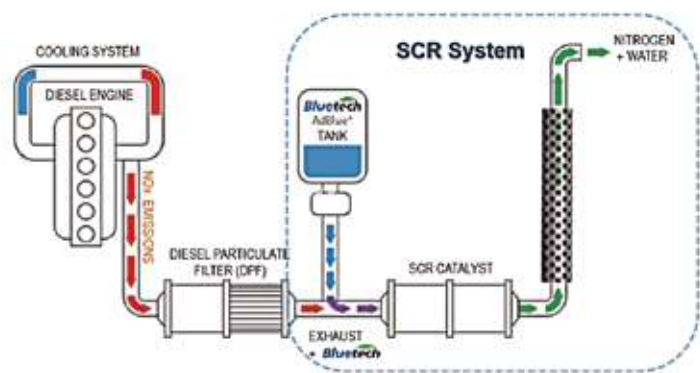

Our annual production is up to 150,000 tons, ensuring a stable supply.

Trusted and Used by Big Companies over Years

We have served large truck manufacturers and public transportation companies as customers for years.

AdBlue® & AUS40 are aqueous urea solution comprised of high-purity urea and pure water, which are essential to Selective Catalytic Reduction(SCR) system, which is a proven and reliable technology to reduce nitrogen oxide (NOx) from diesel engine exhaust while maximizing fuel efficiency.

Major differences between AdBlue® and AUS40:

AdBlue®	AUS40
32.5% high purity urea - Mainly used in vehicles	40% high purity urea - Mainly used in cruise and power station

Packagings

To best suit for our customer's needs, Bluetech provides numerous types of AdBlue® packaging for selection. We also provide suitable equipment to ensure a proper handling of our Bluetech AdBlue® and AUS 40.

10 Litres - For Top-up on the Road

Specially designed to provide a simple and convenient solution for our customers to top-up Bluetech AdBlue® on the road.

1,000 Litres (IBC) - For Easy Storage & High Mobility

IBC, a 1,000-litre bulk container, is best fit for small operators who would like to have a bulk support of Bluetech AdBlue® on site. Its design with pump and dispensing hose offers an expedient solution to our clients.

1,500 - 20,000 Litres - Bulk Storage Tank

Bluetech offers bulk storage and dispensing system, with the variety of size from 1,500 to 20,000 litres, to suit any customer's needs. The system contains self-bunded tanks and retail approved dispensing equipment which allows it to connect to POS system on site.

Equipment

Electric Pumps for IBCs

This is specially designed for IBCs. With the automatic nozzle, and a flexible delivery hose, it allows our customers handling dispensing operation in an easy way.

Flow Meter

An easy-to-install turbine measuring meter is available for our customers to measure the flow volume of low viscosity fluids with readings shown in a compact, readable screen.

SCR Solution Nozzle

We offer ZVA nozzles for the dispensing units.

We are honored to be Asia-Pacific distributor of :
